

```
import java.util.Random;

public class RandomInteger
{

public static void main(String[] args)
{
    Random randomInteger = new Random();    //setup random object
    int i = randomInteger.nextInt(100); //0-99
    System.out.println(i);                //prints random integer
}
}
```
