

```
//Makes a string list
```

```
public class Stringlist
{

    public static void main(String[] args)
    {
        String[] str = {"a", "b"};

        System.out.println(str[1]);    //prints a single item from the list

        for (String s: str)            //prints one by one on new lines
        {
            System.out.println(s);
        }
    }
}
```
